OTIS A

SOFTWARE ENGINEER - MACHINE LEARNING - DIFFUSION TECH

Dallas, Texas, United States | otis@otisai.dev

PROFESSIONAL SUMMARY AND KEY SKILLS

As a software engineer with 2 years of experience, I've had the privilege of contributing to three leading AI companies: PygmalionAI, Nous Research, and Chai Research. My focus has been on frontend development, where I've utilized TypeScript, HTML, CSS, JavaScript, and many other tools to create intuitive and engaging user interfaces. Throughout my career, I've thrived in dynamic environments, collaborating with cross-functional teams and adhering to agile methodologies to deliver high-quality software solutions. My passion for innovation drives me to stay abreast of emerging technologies and industry trends, positioning me as a valuable asset ready to tackle new challenges and contribute to the advancement of AI-driven applications.

PROFESSIONAL EXPERIENCE

Frontend Developer   **OCTOBER/2023**

Chai Research Corp. (Remote)

- Translated design concepts directly from Figma into a functional website, showcasing my ability to bring visual ideas to life while adhering to design specifications and ensuring a seamless user experience.
- Effectively communicated and collaborated with the client team through platforms like Slack, ensuring clear and concise discussions about project requirements, updates, and feedback.
- Leveraged advanced JavaScript programming skills to dynamically map and display job listings from a Content Management System (CMS) on the company's website, enhancing user engagement and providing an efficient and real-time job search experience for visitors.
- Demonstrated strong project management skills by completing the contracted work within the specified timeline, meeting the client's expectations, and delivering a fully functional and visually appealing website for Chai.

Software Developer   **MARCH/2023 – DECEMBER/2023**

PygmalionAI Inc. SPRING, TX 77386-3050 (Remote)

- Collaborated on UI/UX design, frontend development, and API integration using TypeScript, React, and Supabase to enhance user experiences.
- Fostered seamless teamwork across disciplines, gaining insights into project requirements, and resolving challenges to meet service quality benchmarks.
- Regularly updated and managed data using Discord, Slack, and GitHub, contributing to high performance and service standards. Utilized data analysis to enhance operational processes.
- Managed and organized content on the developers' Linear page, incorporating CSS/HTML elements via Figma and Lunacy, demonstrating coding proficiency for graphical enhancements and cross-device compatibility.

Discord Developer/Bot Developer, Frontend, and UI/UX Designer   JUNE/2022 – DECEMBER/2022
(Remote)

- Offered freelance services in Discord development, bot creation, frontend design, and UI/UX design for a diverse clientele.
- Engaged in seamless client coordination, employing effective communication to discern requirements and expectations. Solicited feedback on initial project drafts and established project timelines, fostering an environment of proactive engagement.
- Established and nurtured client trust and professional connections, crafting enduring relationships. Aimed for heightened satisfaction through a collaborative approach ensuring the efficacy of the development process and the excellence of the final product through testing runs and demos.
